

# VeraSMART EZ-Burst Report Distribution

Get the right information, in the right form, into the right hands

EZ-Burst automatically “bursts” a call accounting report into sections by account, cost center, department, or individual personnel, and then emails the sections to appropriate recipients in your organization.

Once you've set up an EZ-Burst distribution list, getting the right information to the right people takes just a few mouse clicks. Choose “EZ-Burst” in the “Run” report options and select the EZ-Burst list of your choice.

## Fast, Efficient, and Secure Report Distribution

EZ-Burst® is a VeraSMART call accounting function that simplifies report distribution. EZ-Burst takes a single report, “bursts” it into sub-sections by account, cost center, department, or individual personnel, and then emails the sections to appropriate recipients. You can create new EZ-Burst lists or add Personnel and accounts to Veramark’s “built-in” lists. You simply identify the recipients, their email addresses, the report sections they may receive, and how the sections will be emailed (by link or by attachment). It’s easy to get the right information, in the right form, into the right hands to make the right decisions.

## Ideal for Automating Distribution to Key Personnel

EZ-Burst output is available for reports based on the Account Code Detail, Assigned Charges by Organization, Call Detail by Organization, and Personal Calls Identified by Organization\* report templates. You can use EZ-Burst to distribute these reports when they are generated on a scheduled or ad hoc basis. EZ-Burst is ideally suited for scheduled reporting to key personnel on a regular basis, allowing you to automate report generation while reducing the need to manually update the distribution lists each time.

## “Built-in” EZ-Burst Lists are Easy to Use

VeraSMART includes built-in EZ-Burst distribution lists for account codes, cost center managers, and individual personnel. These are default options in the output methods and distribution section of the reports that support them.

- Account Code – The account code EZ-Burst distribution list automatically includes the email addresses configured for each account. Account Code Reports using this distribution method are sectioned off by account and emailed to each recipient configured for the account.
- Cost Center Manager – VeraSMART automatically creates an EZ-Burst distribution list that includes all Personnel configured as an EZ-Burst [Cost Center or Department] Managers. Reports using this distribution list are burst into Cost Center and Department sections and emailed to the designated managers. The Cost Center list view lets you see who received your last EZ-Burst Managers report, and when.
- Personnel – The Personnel EZ-Burst distribution list automatically includes every Personnel record enabled for EZ-Burst. Reports using this distribution method are burst into Personnel Detail sections and emailed to each individual.

### **Create Your Own EZ-Burst Lists**

You can also configure your own lists for delivering the right information to precisely the right recipients.

### **License Information**

EZ-Burst is included in the base software for both VeraSMART Call Accounting and Wireless Call Accounting. No incremental license is required to use the EZ-Burst for applicable reports.
