

# VeraSMART EZ-Share Data Export

Get the right information, in the right form, into the right hands

EZ-Share™ makes it easy to export your VeraSMART® data for use by other business management and reporting systems.

VeraSMART EZ-Share makes it easy to configure exports that match your specifications. The export wizard guides you through the process of defining export attributes, field selection, output formatting, and selection criteria. You can generate sample output during the configuration process to verify that the export meets your requirements.

## Flexible integration utility

VeraSMART EZ-Share is a powerful data integration utility that makes it easy to share VeraSMART data with other systems, such as Accounts Payable, HR, Accounting, General Ledger, or other ticketing systems. Features include:

- An intuitive user interface that helps you build a custom report or data export utilizing a graphical data tree
- Instantly generates sample data to validate your design before saving
- Supports calculated fields using standard SQL expressions
- Supports user-defined fields in export file definition
- Output formats include CSV, Microsoft® Excel®, ASCII, Unicode, UTF-8, and XML

## Highly configurable exports

EZ-Share lets you create multiple export configurations of the data in VeraSMART data tables\* such as organization, cost, invoice, asset, inventory, call detail records, personal call or service data. Each export can have its own record layout and output, including:

- Field selection and formatting
- Arithmetic and statistical operations
- Data filtering
- Output scheduling
- Emailing and other post-processing options

\* Available data tables may depend on licensed modules

# VeraSMART EZ-Share Export

EZ-Share guides you through the process of defining export attributes, field selection, output formatting, and selection criteria.

## Schedule or run on demand

After you've configured an export, you can run it on demand or set up a schedule to run automatically. The EZ-Share export options provide a great deal of scheduling flexibility for one-time or automated exports at the selected frequency.

Based on the selected frequency, you can choose from the following run options:

- Days of the week on which to run export
- Next run date/time
- Custom dates to run (up to 12 custom date/times)

By allowing you to specify both the content and scheduling of your exports, EZ-Share helps you get the right information, in the right form, into the right hands to make the right decisions.

## License only what you need

EZ-Share is an incremental module for either wireline or wireless call accounting and can be licensed in two different models:

- EZ-Share – Enterprise version provides unlimited EZ-Share exports. Professional Services to implement EZ-Share exports can be separately quoted
- EZ-Share Single – For those who need fewer EZ-Share exports and who want to speed the implementation process, EZ-Share Single includes a license for one EZ-Share Export, plus one EZ-Share PRO-Builder, two hours of Veramark Professional Services time to implement one EZ-Share Export

EZ-Share is included with Veramark Telecom Expense Management, and EZ-Share Single is included with the VeraSMART Call Accounting Enhanced Chargeback option.

## About Calero Software

Calero Software was formed in December 2013 through the merger of Veramark Technologies, PINNACLE and Movero. Calero offers a suite of global solutions for fixed and mobile Communications Expense Management, Managed Mobility Services, Enterprise Mobility Management, and IT Services Management. Calero has thousands of customers in the United States and more than 40 countries worldwide, including Fortune 1000 corporations, universities and government agencies.
